### **iSupply software application - release advice - version 9.26.3.1**

#### **Prerequisites - iSupply**

iSupply version 9.26.2.1  
Microsoft .NET Framework 4.0  
Microsoft Report Viewer 2010 SP1  
SAP Crystal Reports Runtime Engine for .NET Framework 4

#### **Prerequisites - iSupplyRF**

Microsoft .NET Compact Framework 3.5

#### **iSupply release and version details**

iSupply version: 9.26.3.1  
Release status: General release  
Applications released: iSupply, iSupplyWeb, iSupplyRF

**This release must be installed to the test environment and user acceptance tested before installation to the live environment**

**iSupply version 9.26.3.1** released 18/05/2018 (020695)

**MSI path and name:** <http://www.lsi.net.au/files/versions/iSupply-9-26-3-1.zip>

**SQL update scripts:** DB9-26-3-1.sql

#### **Release inclusions and notes**

Job-no	Code	Details/remarks
--------	------	-----------------

020694	KS	Export confirmed orders - SAG726P Ensure end time is logged in eCS monitor iSupply, eCS
020698	KS	Order Import - EDI731P Rectify priority of error messages when GTIN not found iSupply, eCS
020701	LS	Consignment Entry Populate picker field for all RF picked orders iSupply
020702	KS	Create Pick Slips - stock out management Add facility to apply stock allocations (e.g. stock outs) prior to pick slip creation iSupply
020706	KS	Export summarised invoice Auto populate Output and Backup directories with previously used entries iSupply
020707	KS	Default despatch bin Rectify lookup of default despatch bin iSupply, iSupplyRF
020721	KS	SSCC Label Print / Reprint Ensure reprint of SSCC works when the logistics label print is disabled iSupply
020723	KS	Trading partner accounts Extend fields in trading partner accounts iSupply
020724	KS	Scan Pack / IBN despatch Ensure store packing list is printed on completion of store packing iSupply
020725	KS	Consignment Entry Ensure host system invoice message is only displayed under the appropriate conditions iSupply
020726	KS	Confirm RF Pick/Pack boxes Improve error messages when IBNs not found iSupply
020727	KS	Consignment Entry Ensure transporter drop-down is being populated with default iSupply
020729	LS	Consignment Entry Fix typo in DG not allowed message iSupply

020736	KS	Export Despatched Order - SAG726P Translate trading partner ship to codes to company account codes iSupply
020737	KS	Export Summarised Invoice - csv Add an option to include a csv summary when exporting invoices iSupply
020738	LS	Scan Pack Orders - Supplier/Product labelling style Remove barcode and pack unit type restrictions from the Supplier/Product labelling style iSupply

**New maintainable settings**

Setting	Details
	Allocate stock on release

**Import/export file format changes**

Transaction	Data fields
None	None

**Notes**

--

New Setting - Sender / Warehouse Details >> Allocate stock on release

=====

When turned on, the user is prompted to enter stock allocations during the order release process (Create Pick Slips).

It is designed to allow entry of known stock shortages so that:

1. Pickers are not directed to locations/products which are known to be out
2. RF short pick authorisations are bypassed ( the RF short pick authorisations process is designed to authorise unexpected shortages, not known shortages).

Allocate stock on release can only be turned on in Sender / Warehouses where iSupply is not maintaining stock (Maintain Stock = False).

## **iSupply install steps for this release when upgrading from iSupply version 9.26.2.1**

### **Preparation**

1. Ensure all users are logged out of iSupply and cannot log in.
2. Stop the eCS service on the server that runs it.
3. Stop any external processes that may access the iSupply database.
4. Make a backup copy of the iSupply SQL database.

### **Application server (x86)**

1. Uninstall the currently installed iSupply Windows version via Control Panel.
2. Uninstall the currently installed iSupply eCS Service version via Control Panel.
3. Install iSupply Windows 9-26-3-1.msi by running "setup.exe".
4. Ensure that the configuration file "C:\Program Files\LSI\iSupply Windows\iSupplyWindows.exe.config" has been updated with the server and database names.
5. Install iSupply eCS Service 9-26-3-1.msi by running "setup.exe".
6. Ensure that the configuration file "C:\Program Files\LSI\iSupply eCS Service\iSupplyeCSService.exe.config" has been updated with the server and database names.

### **Application server (x64)**

1. Uninstall the currently installed iSupply Windows version via Control Panel.
2. Uninstall the currently installed iSupply eCS Service version via Control Panel.
3. Install iSupply Windows 9-26-3-1 x64.msi by running "setup.exe".
4. Ensure that the configuration file "C:\Program Files\LSI\iSupply Windows\iSupplyWindows.exe.config" has been updated with the server and database names.
5. Install iSupply eCS Service 9-26-3-1 x64.msi by running "setup.exe".
6. Ensure that the configuration file "C:\Program Files\LSI\iSupply eCS Service\iSupplyeCSService.exe.config" has been updated with the server and database names.
7. NGEN iSupply Windows
  - 7.1. Place the files "ngen.exe" and "NGENiSupplyWindows.bat" into iSupply's installation directory (Default: "C:\Program Files\LSI\iSupply Windows\Client").
  - 7.2. Run the NGENiSupplyWindows.bat from command prompt as an Administrator
8. NGEN iSupply eCS Service
  - 8.1. Place the files "ngen.exe" and "NGENiSupplyeCSService.bat" into iSupply's installation directory (Default: "C:\Program Files\LSI\iSupply eCS Service\Client").
  - 8.2. Run the "NGENiSupplyeCSService.bat" from command prompt as an Administrator

### **Web server (x86)**

1. Uninstall the currently installed iSupply Web Services version via Control Panel.
2. Uninstall the currently installed iSupply Web version via Control Panel.
3. Install iSupply Web Services 9-26-3-1.msi by running "setup.exe".
4. Ensure that the configuration file "C:\inetpub\wwwroot\iSupplyWebServices\Web.config" has been updated with the server and database names.
5. Install iSupply Web 9-26-3-1.msi by running "setup.exe".
6. Ensure that the configuration file "C:\inetpub\wwwroot\iSupplyWeb\Web.config" has been updated with the URL of the iSupplyWebServices.

### **Web server (x64)**

1. Uninstall the currently installed iSupply Web Services version via Control Panel.
2. Uninstall the currently installed iSupply Web version via Control Panel.
3. Install iSupply Web Services 9-26-3-1 x64.msi by running "setup.exe".
4. Ensure that the configuration file "C:\inetpub\wwwroot\iSupplyWebServices\Web.config" has been updated with the server and database names.
5. Install iSupply Web 9-26-3-1 x64.msi by running "setup.exe".
6. Ensure that the configuration file "C:\inetpub\wwwroot\iSupplyWeb\Web.config" has been updated with the URL of the iSupplyWebServices.

### **Database server**

1. Run the following database update script(s) (using SQL Server Management Studio) to update the iSupply database: DB9-26-3-1.sql.

### **Finalisation**

1. Test run iSupply.
2. Start the eCS service on the server that runs it.
3. Start any external processes that may access the iSupply database.
4. Allow users to login to iSupply.
